

Latin for Children

Primers A, B & C

Latin for Children is an engaging, incremental, & creative curriculum, designed to introduce students as young as third grade to Latin. The *Primer A* text, and supplemental materials, make

up the first year of a three year series. *Latin for Children*

is a modular and flexible program, with elements to engage students of every learning style. As a step beyond just an exposure to the language, it trains students in grammar, vocabulary and English derivatives in a lively, interactive way that is perfectly suited to students in the grammar stage. Even better, *Latin for Children* is taught directly to the child, and is a perfect choice for teachers and parent who will be learning along with their students.

The Art of Argument

Informal Logic

Junior high aged students will argue (and sometimes quarrel), but they won't argue well without good training. *The Art of Argument* is designed to teach the argumentative

adolescent how to reason with clarity, relevance and purpose at a time when he has a penchant for the "why" and "how." It will equip and sharpen young minds as they live, play, and grow in this highly commercial culture. This course teaches students to recognize and identify twenty-eight informal fallacies, and now this eye-catching text includes over sixty slick and clever, "phony advertisements" for items from blue jeans to pick-up trucks, which apply the fallacies to a myriad of real life situations.
